

# Karen Serafini

My work uses a type of resin that is specially formulated for artists.

The creation of each piece takes a minimum of 30 days. Mica pigments are added to the liquid resin and manipulated by hand to achieve the brilliantly colored and three-dimensional effects. Each piece is hand-formed during the curing process, resulting in truly unique and one-of-a-kind works of art.

My creations are inspired by nature, especially the shapes and colors of the sea and of the seasons.

I hope you enjoy!
